FBI Releases

Dear Quin, Re FBIHQ JFK releases - photographs 4/20/78

A media inquiry reminds me that I have not come to any photograph in any of the records I've had a chance to go over.

There is no doubt from the record that I have, from the first, had a very large interest in the photographs. In fact I did a book recounting how they were withheld. I have pending requests for some, filed a suit eight years ago about others, etc.

While I am still anxious to obtain them I am aware of the possibility of much duplication between HQ and FOs, for example.

So I am writing not only about obtaining them but in an effort to reduce costs and time for the FBI.

Perhaps it might be best to discuss this with the FBI at a mutually convenient time.

I'd appreciate your views.

I will be in Washington on the fifth and the 10th for status calls.

The later date might be better for the FBI because it may by then have some notion of what photographs are in the files of the Office of Origin, which should be in Washington by then.

It would probably be better for me also because I have not been feeling as well lately and have a cold.

It is not unlikely that some of the pictures are valueless. I would be willing to go over them and select out those that are not relevant or are exact duplicates.

Sincerely,

Harold Weisberg
